

Assignment 1 (Given: Apr 10, Due: Apr 21)

You are required to redesign the departmental website (<https://cs.qau.edu.pk>) and implement the redesigned website. The best design will be hosted on the departmental website for some time with credits to the student.

1. Choose a suitable color scheme.
2. Visit each of the current pages, and see how the visual appearance of the page can be improved.
3. Design layouts for Mobile, Tablet, Desktop, and TV screens for all the pages. Use mobile first approach.
4. Use appropriate HTML and CSS elements, techniques, and effects wherever applicable.
5. Write a report about all your decisions about design and choosing HTML/CSS elements/techniques.

Instructions:

Following these instructions carries marks.

- Host your code on Github pages and share the link. Do not commit after the deadline.
- Any genuine efforts in each part, would result in at least 50% marks (in that part). Make sure you put your best efforts to solve every part. Each part carries its own marks. You are getting 50% marks for any genuine efforts in all the parts to encourage you to learn, even if your submission is full of errors). Therefore, please do not plagiarize! Plagiarism includes taking help in any form including but not limited to code, concept or idea for the solution. Taking help from any source including but not limited to classmates, seniors, internet, or GenAI (ChatGPT, DeepSeek, etc.) is prohibited. In case your code is plagiarized, you'll get -50% absolute marks of the whole assignment. For example, if the assignment is of 50 marks, you will get -25 marks. **Even a single plagiarized statement will count as plagiarism for the whole assignment.** Plagiarism in two assignments may result in getting failed in the course.
